

TWO SYSTEMS. ENDLESS COMFORT.

NITE® PHOENIX

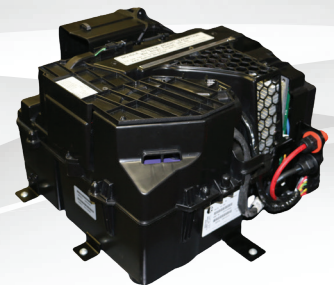

Finding the best no-idle system for your sleeper is important. While there are a few differences between the NITE Phoenix and NITE SSI, each system offers unmatched comfort and efficiency, and both are the best-selling battery-operated, no-idle systems on the market.

The next generation of NITE, this unit is designed for drivers who travel in scorching hot conditions. As a battery-powered, no-idling system, the NITE Phoenix generates the highest BTU/hr cooling capacity at 7,500 BTU/hr without sending damaging emissions into the environment.

Beating the heat comes down to three letters: SSI. As a battery-powered, no-idling system, the NITE SSI generates the highest BTU/hr cooling capacity at 7,500 BTU/hr without sending damaging emissions into the environment.

With the NITE Phoenix or NITE SSI, you can rest assured that your investment will keep you comfortable in various environments.

NITE® SPACE SAVING INNOVATION
(SSI)

AT A GLANCE: WHAT'S THE DIFFERENCE?

NITE PHOENIX

- Durable steel construction
- Large 12V compressor leads to larger cooling capacity
- Optional Controller with Bluetooth technology available
- Sealed refrigeration loop

NITE SSI

- SSI split system allows servicing the refrigeration loop using a replaceable evaporator coil, TXV, drier and condenser coil
- Brushless motors in compressor and condenser fan for extended life
- Digital controller with wireless technology included

BOTH SYSTEMS

- Automatic digital temperature control
- 8 to 10 hours of run time
- California Air Resources Board (CARB) Compliant
- Installs easily under the bunk or side storage areas
- Adaptable to OEM ductwork in most applications
- Features new evaporator filter for extended coil life
- Vibration eliminators to reduce vibration and noise
- Features metering devices

HOW TO DETERMINE WHICH SYSTEM IS RIGHT FOR YOU.

Choosing Bergstrom was the first great choice you've made. Now, you just need to decide which NITE system will be the best solution for you. Answering the following questions will send you down the right road to your perfect NITE.

- 1 What is the make of your truck?

- 2 What is the model of the truck?

- 3 What is the year of the truck?

- 4 What size is your bunk?

- 5 Do you have a workstation?

- 6 Do you have a back-wall window?

- 7 Do you have a fuel-siphoned heater?

- 8 What is the in-frame space size for the battery box?

- 9 What is the current size of your alternator?
